

## MC99 Data Sheet

### Typical Properties\*:

|                |          |
|----------------|----------|
| m-Cresol       | 99.0%    |
| p-Cresol       | <1.0%    |
| Moisture       | < 0.05%  |
| Total Sulfur   | < 0.001% |
| Nitrogen Bases | < 0.001% |
| Color, APHA    | < 50     |

\*At loading

### Additional Information:

|                |                       |
|----------------|-----------------------|
| Boiling point: | 202° C                |
| Melting point: | 10 °C (May supercool) |
| UN #:          | 2076 Cresols, liquid  |

Packaging: Available in railcar, tank truck, isocontainer, 450 lb drum, 200 kg drum

Shelf life: Cresylic acids are stable and have an indefinite shelf-life with regard to composition. Depending upon storage conditions, they may absorb moisture from the air, darken in color over time, or leach low level metals from the storage vessel. This will be minimized, however, if the container remains sealed and the product is not exposed to air or excessive heating.

Applications: Phenolic resins, color formers, antioxidants, chemical intermediates.
